

MAINTAIN YOUR PASSION

Auto-detection of 6V or 12V batteries to ensure optimum charging and maintenance for peak battery performance.

Suitable for charging Lead Acid & Lithium batteries with specific profiles for each for maximum charge efficiency to extend service life.

Total control in the palm of your hand. Monitor battery status, adjust settings, and view charge history all via the VictronConnect Bluetooth App.

1.1A output and fully automatic charging algorithms, designed to take the guess work out of battery care.

Set and forget - the charger adjusts automatically to ensure battery is properly charged before auto switching to storage / maintenance mode.

BLUE SMART IP65 BATTERY CHARGER & MAINTAINER FOR LEAD ACID & LITHIUM TYPE BATTERIES

If you're passionate about your pride & joy, ensure it's ready to go every time with the Blue Smart IP65 Charger & Maintainer. Suitable for 6 & 12V Lead Acid & Lithium batteries commonly used in motorcycles and PWC's, it features Bluetooth smart real-time monitoring and control in the palm of your hand.

Designed in a compact IP65 water resistant and dust protected case, the Blue Smart charger uses a fully automatic charge algorithm to provide users with super easy "Set and Forget" functionality. With multiple safety protocols built in so you can rely on the Blue Smart Charger to keep your battery fully charged and properly maintained, ready for your next adventure.

Easy Plug & Play design with any of the three included cables for different uses.

Model No: VECIP65-6-12/1.1
Part No: BPC120134014R
