

## Technical Information

Delkor AGM batteries are engineered to support the increased electrical loads of Idle Stop Start (ISS) vehicles, providing reliable starting power in the most demanding conditions.

The AGM design coupled with patented PowerFrame® grid technology delivers the best solution for applications where superior battery life and performance is required. Can also be installed as a high performance upgrade for most LN6 flooded applications.

## Features & Benefits

- Patented PowerFrame® grids extend battery life
- OE proven technology
- Designed for Idle Stop Start technology
- High charge acceptance
- High vibration resistance
- Certified non-spillable design
- Low self-discharge

### Applications

Idle Stop Start vehicles
Prestige European
Premium SUV & 4x4
